Sub Directories

List Contents

Delete

Deep Delete

Move

Rename

Copy

```
var
  directoryName = $('#directory-names').val();
localFileSystem.request(function(fileSystem) {
  fileSystem.root.getDirectory(
    directoryName,
    { create: true },
    // { create: true, exclusive: true },
    function(directory) {
```

RESULT

Documents created

```
{
  filesystem: "[object
DOMFileSystem]",
  fullPath: "/Documents",
  name: "Documents",
  isDirectory: "true",
  isFile: "false"
}
```
